Technical Questions

1. What is Learning Management System (LMS)?

   A learning management system (LMS) is a software application for the administration, documentation, tracking, reporting and delivery of educational courses, training programs, or learning and development programs. The learning management system concept emerged directly from e-Learning.

2. What is ERP and how can it help the school?

   EduSys School Enterprise Resource Program (ERP) is one of the most advanced and user friendly ERP Software designed for all educational institutions for managing school activities, admissions, library, staff, attendance and many more. The ERP system provides the solution of all requirements of Admission Counselor in streamlining the complete admission process.

3. What is your stance on School Software?

   School ERP Software can generate circulars, send SMSs instantly, and have a multilingual option to make the communication effective for parents from different regions. The application has Teacher's Calendar with Lesson Plan, Schedule, and Status, which the concerned authorities may view at any given point in time for any teacher teaching any class. With EduSys School ERP, the school may generate and print customised Report Cards as per their requirements.
